SUMMARY

- I'm a full-stack developer with hands-on experience in React, Next.js, and Tailwind CSS.
- Worked with companies like JigoPlast and HotFoot AI, building full-stack solutions including websites, CRMs, and AI-powered applications.
- Currently I'm working as a Software Developer at Katalyst AI, AI-powered business intelligence platform that helps companies automate research, lead scoring, and account planning.

WORK EXPERIENCE

Software Developer - KatalystAI   **July 2025**

- Developed an AI-powered platform for company research, contact finding, and business intelligence..Integrated multiple AI providers and third-party APIs to deliver actionable insights.
- Built signal tracking features such as website visits, ad/email clicks, and customer job changes

Full Stack Developer - HotFoot AI   **Jan 2025 - July 2025**

- Collaborated with the founding team to build intuitive UI and improve UX based on user feedback.
- Contributed to backend APIs for itinerary generation and data management, ensuring smooth integration with the frontend.

Full Stack Developer - Jigoplast   **Sept 2024 - Dec 2024**

- Built a modern, user-friendly website for JigoPlast, a package manufacturing company, enhancing customer trust and product exploration.
- Worked with stakeholders and engineering to develop a CRM for product management, contributing to frontend and backend.

PERSONAL PROJECTS
